

Index 2006

Volume 56

Index of Authors

| page | page | page |
|---|---|---|
| Bahners, T. , Schlosser, U., Schollmeyer, E.: Field modification for optimised fiber production by electrospinning246 | L.M.: New fibers for floorcoverings and textile applications29 | Jungbecker, P. , Gries, T., Mählmann, I., Seide, G.: CFD analysis for aerodynamic layered nonwovens314 |
| Bakhshandeh, B. , Rahbar, R.S., Mojtahedi, M.R.M., Heydarinia, M.: Effect of setting zone variables on the physical properties of PET textured yarn54 | Gähr, F. , Lehr, T.: Dyeing of textiles made of non-modified polypropylene fibers.....116 | Kalies, S. , Rademacher, M.: Global capacity expansion for BCF carpet yarns384 |
| Bertamini, L. , Caldara, M., Giacomelli, G., Pontarin, L.M., Fambri, L., Casagrande, A.: New fibers for floorcoverings and textile applications29 | Gerking, L. : Nanoval process – unique hydrodynamic effect (Part 2)57 | Kamiyama, M. , Numata, M., Ohkoshi, Y.: New nanoscale polyester fiber35 |
| Bill, M. : Ems-Griltech: new fiber specialties.....238 | Giacomelli, G. , Pontarin, L.M., Fambri, L., Casagrande, A., Bertamini, L., Caldara, M.: New fibers for floorcoverings and textile applications29 | Kentab, A. : Sabic: current and future role in global EG market.....25 |
| Blomberg, T. , Lundberg, R., Brattberg, T.: Cellulose fibers – cost efficient component in filter media96 | Glawion, E. : Meltblown and spunbond systems for PET122 | Kochoan, J. , Stupak, A., Revs, M., Budzak, D., Jambrich, M.: Development of special types of PP fibers in Slovakia161 |
| Brattberg, T. , Blomberg, T., Lundberg, R.: Cellulose fibers – cost efficient component in filter media96 | Gneuss, S. : Economics of melt filtration ...366 | Koslowski, H.-J. : Current problems with textile labeling.....2 |
| Budzak, D. , Jambrich, M., Kochoan, J., Stupak, A., Revs, M.: Development of special types of PP fibers in Slovakia161 | Goosens, A. , De Saedeleir, D.: Innovative applications of biopolymers92 | Kulpinski, P. , Niekraszawicz, B., Rubacha, M., Laszkiewicz, B., Czarnecki, P.: New generations of lyocell fibers.....234 |
| Burrow, T. , Morley, B.: Tencel lyocell fibers for carpets41 | Gries, T. , Seide, G., Linnemann, B.: Spinneret for nano-nonwovens – an approach.....186 | Lai, Kan, Sun, Runjun, Wang, Ni, Zhang, Jianchun: Structure and properties of polyester blended yarn produced by one spinneret380 |
| Caldara, M. , Giacomelli, G., Pontarin, L.M., Fambri, L., Casagrande, A., Bertamini, L.: New fibers for floorcoverings and textile applications29 | - Trends in textured yarn production and technology264 | Lang, A. : Spunlace & PM 2.5 – the right alternative?312 |
| Casagrande, A. , Bertamini, L., Caldara, M., Giacomelli, G., Pontarin, L.M., Fambri, L.: New fibers for floorcoverings and textile applications29 | - Mählmann, I., Seide, G., Jungbecker, P.: CFD analysis for aerodynamic layered nonwovens.....314 | Laszkiewicz, B. , Czarnecki, P., Kulpinski, P., Niekraszawicz, B., Rubacha, M.: New generations of lyocell fibers.....234 |
| Charaf, F. : Global polyester & PET chain update198 | Hart, D. : Spandex business – is this the low point?.....157 | Lehr, T. , Gähr, F.: Dyeing of textiles made of non-modified polypropylene fibers116 |
| - Polyamide chain global trends.....70 | Häuptli, A. : Smart feeding technology improves quality in textile fiber production105 | Linke, M. , Milwich, M., Sarsour, J., Scher- rieble, A., Schneider, P., Planck, H., Stegmaier, T., von Armin, V.: Potentials and current bionic research activities with fiber-based materials.....360 |
| Conrad, S. , Wöstmann, S.: Kreyenborg: new generation of piston screen changers for melt filtration in polymerization250 | Hayhurst, M.J. : Spunbond cellulose.....386 | Linnemann, B. , Gries, T., Seide, G.: Spinneret for nano-nonwovens – an approach186 |
| Czarnecki, P. , Kulpinski, P., Niekraszawicz, B., Rubacha, M., Laszkiewicz, B.: New generations of lyocell fibers.....234 | Heinze, T. , Schulze, T.: 7 th International Symposium Alternative Cellulose – Manufacturing, Forming, Properties.....356 | Lundberg, R. , Brattberg, T., Blomberg, T.: Cellulose fibers – cost efficient component in filter media96 |
| Davies, B. : Fiber trends for nonwovens223 | Hell, E. : Recycling of fibers, fabrics and nonwovens.....257 | Lützkendorf, R. , Ortlepp, G.: Long carbon fibers from textile wastes363 |
| De Breuck, H. : Monofilaments for technical textiles39 | Hermanutz, F. , Meister, F., Uerdingen, E.: New developments in the manufacture of cellulose fibers with ionic liquids342 | Machatschke, R. , Doneit, B.: Fibers for high-temperature textiles.....289 |
| De Decker, S. , Ruys, L., Vanneste, M.: Effect of color pigments on PP FDY yarn properties and weaving behavior112 | Herwegh, F. , Reichwein, M.: Feasibility of PET super-microfilament yarn production.....374 | Mäder, E. , Rothe, C.: Tailoring of commingled yarns for effective composite properties298 |
| De Saedeleir, D. , Goosens, A.: Innovative applications of biopolymers.....92 | Herzberg, M. , Wagner, U.: Processing new polymers with the MPS texturing machine.....180 | Mählmann, I. , Seide, G., Jungbecker, P., Gries, T.: CFD analysis for aerodynamic layered nonwovens314 |
| Doneit, B. , Machatschke, R.: Fibers for high-temperature textiles.....289 | Heydarinia, M. , Bakhshandeh, B., Rahbar, R.S., Mojtahedi, M.R.M.: Effect of setting zone variables on the physical properties of PET textured yarn54 | Makarova, R.A. , Perepelkin, K.E.: High temperature resistant polyoxadiazole fibers and yarns224 |
| Dortmans, J. : Diofort PPS-based high-tenacity multifilament yarn allows new applications293 | Hollick, L. : Effect yarn with MPS texturing machine303 | Marsche, M. , Schick, W.: PTFE yarns, unique yarn properties achieved by exclusive production technology292 |
| Einzmann, M. , Rahbaran, S., Redlinger, S.: New bioactive cellulosic fibers.....98 | Horn, F.J. : US manufactured fiber and textile industry: overview and prospects.....350 | Meier, K. : Dye package – the quality pre-requisite for yarn dyeing.....108 |
| Fambri, L. , Casagrande, A., Bertamini, L., Caldara, M., Giacomelli, G., Pontarin, | Jambrich, M. , Kochoan, J., Stupak, A., Revs, M., Budzak, D.: Development of special types of PP fibers in Slovakia161 | |
| | Jin Xiangyu , Wang Shanyuan, Wang Caihua: Contraction, velocity and discharge coefficients of hydroentanglement nozzles189 | |

| Meister, F. , Uerdingen, E., Hermanutz, F.: New developments in the manufacture of cellulose fibers with ionic liquids342 | Revs, M. , Budzak, D., Jambrich, M., Kochaan, J., Stupak, A.: Development of special types of PP fibers in Slovakia161 | Tavanaie, M.A. , Mirzabaghi, V., Mojtahedi, M.: Effects of draw ration distribution on the physical properties of PET false-twist textured yarns305 |
| Milwich, M. , Sarsour, J., Scherrieble, A., Schneider, P., Planck, H., Stegmaier, T., von Armin, V., Linke, M.: Potentials and current bionic research activities with fiber-based materials360 | Roth, M. , Schneider, A.: Optimizing mechanical properties of PP fibers and nonwovens through a novel vis-breaking technology177 | Thiele, U.K. : Polyester related conferences – spoiled for choice?144 - International Polyester Recycling Forum349 |
| Mirzabaghi, V. , Mojtahedi, M., Tavanaie, M.A.: Effects of draw ration distribution on the physical properties of PET false-twist textured yarns305 | Rothe, C. , Mäder, E.: Tailoring of commingled yarns for effective composite properties298 | Uerdingen, E. , Hermanutz, F., Meister, F.: New developments in the manufacture of cellulose fibers with ionic liquids342 |
| Mojtahedi, M. , Tavanaie, M.A., Mirzabaghi, V.: Effects of draw ration distribution on the physical properties of PET false-twist textured yarns.....305 | Rubacha, M. , Laszkiewicz, B., Czarnecki, P., Kulpinski, P., Niekraszawicz, B.: New generations of lyocell fibers.....234 | van Endert, E. : Melt-To-Resin: new method to produce PET resin economically without SSP286 |
| Mojtahedi, M.R.M. , Heydarinia, M., Bakhshandeh, B., Rahbar, R.S.: Effect of setting zone variables on the physical properties of PET textured yarn54 | Ruys, L. , Vanneste, M., De Decker, S.: Effect of color pigments on PP FDY yarn properties and weaving behavior112 | Vanneste, M. , De Decker, S., Ruys, L.: Effect of color pigments on PP FDY yarn properties and weaving behavior112 |
| Morley, B. , Burrow, T.: Tencel lyocell fibers for carpets41 | Sarsour, J. , Scherrieble, A., Schneider, P., Planck, H., Stegmaier, T., von Armin, V., Linke, M., Milwich, M.: Potentials and current bionic research activities with fiber-based materials360 | Vois, J. : Dacron multi-channel fibers for automotive textiles – advantages in the dyeing process230 |
| Muzadique, F. : Fiber plant design solutions171 | Scherrieble, A. , Schneider, P., Planck, H., Stegmaier, T., von Armin, V., Linke, M., Milwich, M., Sarsour, J.: Potentials and current bionic research activities with fiber-based materials360 | von Armin, V. , Linke, M., Milwich, M., Sar- sour, J., Scherrieble, A., Schneider, P., Planck, H., Stegmaier, T.: Potentials and current bionic research activities with fiber-based materials360 |
| Nasri, L. : Complete PET extrusion system for technical yarns176 | Schick, W. , Marsche, M.: PTFE yarns, unique yarn properties achieved by exclusive production technology292 | Wagner, U. , Herzberg, M.: Processing new polymers with the MPS texturing machine180 |
| Niekraszawicz, B. , Rubacha, M., Laszkie- wicz, B., Czarnecki, P., Kulpinski, P.: New generations of lyocell fibers.....234 | Schlosser, U. , Schollmeyer, E., Bahners, T.: Field modification for optimized fiber production by electrospinning246 | Wang Caihua , Jin Xiangyu, Wang Shanyuan: Contraction, velocity and discharge coeffi- cients of hydroentanglement nozzles189 |
| Numata, M. , Ohkoshi, Y., Kamiyama, M.: New nanoscale polyester fiber35 | Schmenk, B. : Melt spinning facilities at ITA completed330 | Wang Shanyuan , Wang Caihua, Jin Xiangyu: Contraction, velocity and discharge coeffi- cients of hydroentanglement nozzles189 |
| Ohkoshi, Y. , Kamiyama, M., Numata, M.: New nanoscale polyester fiber35 | Schmidt, O. : Process optimization by melt filtration48 | Wang, Ni ; Zhang, Jianchun; Lai, Kan; Sun, Runjun: Structure and properties of polyester blended yarn produced by one spinneret380 |
| Ortlepp, G. , Lützkendorf, R.: Long carbon fibers from textile wastes363 | Schneider, A. , Roth, M.: Optimizing mechanical properties of PP fibers and nonwovens through a novel vis-breaking technology177 | Wang, S. , Zhang, J., Zhang, Z.: Testing on morphology of blended air-textured yarn by diacetate and polyester filaments using EIB301 |
| Perepelkin, K.E. , Makarova, R.A.: High temperature resistant polyoxadiazole fibers and yarns224 | Schneider, P. , Planck, H., Stegmaier, T., von Armin, V., Linke, M., Milwich, M., Sarsour, J., Scherrieble, A.: Potentials and current bionic research activities with fiber-based materials360 | Wang, Shan-Yuan ; Qin, Xiao-Hong; Yang, En-Long: Electrospinning: carbon nanofibers from polyacrylonitrile by carbonization370 |
| Planck, H. , Stegmaier, T., von Armin, V., Linke, M., Milwich, M., Sarsour, J., Scherrieble, A., Schneider, P.: Potentials and current bionic research activities with fiber-based materials.....360 | Schollmeyer, E. , Bahners, T., Schlosser, U.: Field modification for optimized fiber production by electrospinning246 | Watzl, A. : Cost saving in production of hygiene, medical and wipes nonwovens127 |
| Pontarin, L.M. , Fambri, L., Casagrande, A., Bertamini, L., Caldara, M., Giacomelli, G.: New fibers for floorcoverings and textile applications29 | Schulze, T. , Heinze, T.: 7 th International Symposium Alternative Cellulose – Manufacturing, Forming, Properties356 | Wittorf, E. : significance of synthetic staple fibers for nonwovens industry and fiber production60 |
| Previero, D. : PET bottle recycling (washing)118 | Seide, G. , Jungbecker, P., Gries, T., Mählmann, I.: CFD analysis for aerodynamic layed nonwovens314 | Wöstmann, S. , Conrad, S.: Kreyenborg: New generation of piston screen changers for melt filtration in polymerization250 |
| Prisse, A. : Polyolefin textiles in the European context134 | Seide, G. , Linnemann, B., Gries, T.: Spinneret for nano-nonwovens – an approach186 | Yang, En-Long ; Wang, Shan-Yuan; Qin, Xiao-Hong: Electrospinning: carbon nanofibers from polyacrylonitrile by carbonization370 |
| Qin, Xiao-Hong ; Yang, En-Long; Wang, Shan-Yuan: Electrospinning: carbon nanofibers from polyacrylonitrile by carbonization370 | Slater, A. : Tencel lyocell fibers for nonwovens45 | Zhang, J. , Zhang, Z., Wang, S.: Testing on morphology of blended air-textured yarn by diacetate and polyester filaments using EIB301 |
| Qin, Y. : Functional modifications of chitosan fibers159 | Stegmaier, T. , von Armin, V., Linke, M., Milwich, M., Sarsour, J., Scherrieble, A., Schneider, P., Planck, H.: Potentials and current bionic research activities with fiber-based materials360 | Zhang, Jianchun ; Lai, Kan; Sun, Runjun; Wang, Ni: Structure and properties of polyester blended yarn produced by one spinneret380 |
| Rademacher, M. : Nonwoven industry on the move322 - Kalies, S.: Global capacity expansion for BCF carpet yarns384 | Stündl, M. : New state-of-the-art color pop adjustment174 | Zhang, Z. , Wang, S., Zhang, J.: Testing on morphology of blended air-textured yarn by diacetate and polyester filaments using EIB301 |
| Rahbar, R.S. , Mojtahedi, M.R.M., Heydarinia, M., Bakhshandeh, B.: Effect of setting zone variables on the physical properties of PET textured yarn54 | Stupak, A. , Revs, M., Budzak, D., Jambrich, M., Kochaan, J.: Development of special types of PP fibers in Slovakia161 | |
| Rahbaran, S. , Redlinger, S., Einzmann, M.: New bioactive cellulosic fibers98 | Tan Yiwu : Current situation in the Chinese plastics recycling market182 | |
| Redlinger, S. , Einzmann, M., Rahbaran, S.: New bioactive cellulosic fibers98 | | |
| Reichwein, M. , Herwegh, F.: Feasibility of PET super-microfilament yarn production374 | | |

Subject Index

| Subject Index | page | Subject Index | page |
|---|---|--|--------------------------------------|
| Raw Materials: General | | Polyethylene fiber for prosthetic limbs | 74 |
| Applications of nanoparticles in and on fibers and textile fabrics | 242 | Polymer and metal nanofibers via electro- spinning and their application..... | 240 |
| Biodegradable polymer (PLA) | 26 | Polymers and fibers for nonwovens..... | 223 |
| Biopolymers: innovative applications..... | 92 | PPS-based high-tenacity multifilament yarn allows new applications | 293 |
| Brief information | 24, 25, 28, 88, 90, 154, 155, 220-222, 284, 340, 341 | PTFE yarns: unique yarn properties achieved by exclusive production technology | 292 |
| Company news..... | 28, 88, 90, 154, 155, 220-222, 284, 28, 340, 341 | Sensor fibers for load control in braided and woven ropes and belts..... | 242 |
| Ethylene glycol market: Sabic role | 25 | T-400 as problem solver for elastic fabrics..... | 244 |
| Fiber raw materials – market trends: Taiwan | 155 | Twaron p-aramid jet-spun pulp and fibrils..... | 170 |
| Raw Materials: Cellulosics | | Twaron yarns for cut protection gloves..... | 294 |
| Cellulose fiber production with ionic liquids: new developments..... | 342 | High temperature resistant polyoxadiazole fibers and yarns | 224 |
| Dissolving and processing of cellulose in ionic liquids..... | 240 | Fibers/Yarns: Cellulosics | |
| Ionic liquids as cellulose solvents..... | 240, 285 | Alternative Cellulose – Manufacturing, Forming, Properties: conference report.. | 356 |
| Lyocell dissolving system | 345 | Bioactive cellulosic fibers | 98 |
| Raw Materials: PA | | Cellulose fibers – cost efficient component in filter media | 96 |
| Brief information | 88 | High performance rayon filament in tire and other applications..... | 240 |
| Caprolactam capacity: CIS..... | 221 | Lyocell fibers: new generations | 234 |
| Raw Materials: PET | | Sorption studies on regenerated cellulosic fibers in salt-alkali mixtures..... | 243 |
| Brief information | 24, 88 | Tencel lyocell fiber for filling..... | 102 |
| Crystallization and drying of post consumer regrid to manufacture high-grade fibers | 347 | Tencel lyocell fibers for carpets | 41 |
| International Polyester Recycling Forum | 349 | Tencel lyocell fibers for nonwovens..... | 45 |
| Melt-To-Resin: new method to produce PET resin economically without SSP..... | 286 | Viscose fiber with PCM technology..... | 359 |
| Polyester raw materials: global trends..... | 220 | Viscose staple fiber for wipes..... | 6 |
| PTA and polyester: global overview | 26 | Fibers/Yarns: PA | |
| p-Xylene market trends: world..... | 24 | Fiber specialties (Ems-Griltech)..... | 238 |
| Starlinger: Open House | 347 | Fibers for floorcoverings and textile applications..... | 29 |
| Fibers/Yarns: General | | PA high performance yarns for technical applications | 242 |
| Bi-component yarns for elastic spacer fabrics | 245 | Fibers/Yarns: PET | |
| Bionic research activities with fiber-based materials | 360 | Brief information | 6, 8, 11 |
| Biopolymers: new industrial fiber based on them and applications..... | 244 | Dacron multi-channel fibers for automotive textiles – advantages in the dyeing process | 230 |
| Brief information | 270 | Engineered short cut PET staple fibers for wet laying processes | 259 |
| Chitosan fibers: functional modifications..... | 159 | Global polyester & PET chain | 198 |
| Conjugate filament yarn based on acetate | 244 | Micro PET textured yarn with improved properties | 240 |
| Dornbirn 2006: developments in fibers and yarns..... | 240 | Nanoscale PET fiber | 35 |
| Elastane yarn business – is this the low point? | 157 | PET textile filament yarn | 242 |
| Elastane yarn capacities..... | 10 | PTA and polyester: global overview | 26 |
| Engineered spider silk – new material for textile applications..... | 242 | Self-control PET fiber for smart textiles..... | 246 |
| Fibers for floorcoverings and textile applications | 29 | Shortcut PET staple fibers for wet laying processes | 259 |
| Fibers for high-temperature textiles | 289 | Fibers/Yarns: PP | |
| FIDYST fiber dynamics simulation tool..... | 260 | Development of special types of PP fibers in Slovakia..... | 161 |
| Long carbon fibers from textile waste | 363 | Fibers for floorcoverings and textile applications..... | 29 |
| Manufactured fiber and textile industry: USA | 350 | Fiber Production: General | |
| Monofilaments for technical textiles | 39 | Achema preview..... | 103, 104 |
| Nanofibers by electrospinning for new applications..... | 192 | BCF carpet yarns: global capacity expansion | 384 |
| PLA: raw material for packaging and nonwovens..... | 261 | BCF extrusion system..... | 252 |
| | | Brief information | 103, 104, 156, 157, 252, 295, 296 |
| | | Ceramic extrusion spinning jets | 252 |
| | | Chinese plastics recycling market: current situation | 182 |
| | | CITME preview | 295, 296 |
| | | Color pop adjustment – state-of-the-art.... | 174 |
| | | Company news | 103, 104, 156, 157, 252, 295, 296 |
| | | Contact angle measuring system | 117 |
| | | Debaler for compressed bales..... | 355 |
| | | Dye package - the quality pre-requisite for yarn dyeing..... | 108 |
| | | Electrospinning: carbon nanofibers from PAN by carbonization | 370 |
| | | Fiber plant design solutions | 171 |
| | | Field modification for optimized fiber production by electrospinning..... | 246 |
| | | High-speed shredder for recycling plastic waste | 346 |
| | | ITM preview | 156, 157 |
| | | Melt filtration: economics | 366 |
| | | Melt spinning of fine-titer biocompatible poly(3-hydroxybutyric acid) filament yarns | 244 |
| | | Melt spinning of PVDF filament yarns for new applications..... | 242 |
| | | Modification of fiber surfaces for nonwovens | 260 |
| | | Multi-layer monofilament yarns for textiles and artificial grass | 385 |
| | | Online monitoring of filament yarn productions | 243 |
| | | PET blended yarn produced by one spinneret: structure and properties | 380 |
| | | PET recycling technology: ultra clan with IV like virgin and energy saving..... | 365 |
| | | Piston screen changers for melt filtration in polymerization..... | 250 |
| | | Project list of new polymer and chemical fiber plants 2006..... | 164 |
| | | Recycling of fibers, fabrics and nonwovens..... | 257 |
| | | Sensor-based quality monitoring of man-made fiber processing | 243 |
| | | Smart feeding technology improves quality in textile fiber production | 105 |
| | | Synthetic staple fiber significance for non- wovens industry and fiber production | 60 |
| | | Synthetic yarn machinery for improved yarn characteristics..... | 245 |
| | | Tailoring of commingled yarns for effective composite properties | 298 |
| | | Twisting and cabling machine..... | 252 |
| | | Melt filtration for process optimization | 48 |
| | | Thermal shrinkage tester | 53 |
| | | Fiber Production: Cellulosics | |
| | | Lyocell technology: versatile platform for high value creatin fiber products for medical applications..... | 245 |
| | | Producing finest cellulose fibers according to the direct dissolution process | 243 |
| | | Fiber Production: PET | |
| | | Complete PET extrusion system for technical yarns..... | 176 |
| | | Feasibility of PET super-microfilament yarn production | 374 |

Subject Index

| | |
|--|-----|
| Influence of polymer modification on the structure formation and processing of PET POY | 243 |
| Innovations for technical textiles and nonwovens | 120 |
| Microcellular polyester: one-step process for creating foamed fibers | 244 |
| PET bottle recycling (washing) | 118 |
| Setting zone variables: effect on physical properties of PET textured yarn | 54 |
| Super micro spinning and texturing machines | 242 |
| Transfer line injection for added properties in fibers | 244 |
| Fiber Production: PP | |
| Color pigment effect on PP FDY yarn properties and weaving behavior | 112 |
| Dyeing of textiles made of non-modified PP fibers | 116 |
| Optimizing properties of PP fibers and nonwovens with vis-breaking technology | 177 |
| Stabilizer for PP fibers | 59 |
| Texturing | |
| Brief information | 156 |
| Company news | 156 |
| Draw ratio distribution in sequential false-twist texturing of PET yarn | 305 |
| Draw-texturing machines: world market trends | 211 |
| Effect yarn with MPS texturing machine | 303 |
| ITM preview | 156 |
| Manual texturing concept | 59 |
| Manual texturing machine | 309 |
| MPS texturing machine for processing new polymers | 180 |
| Sensor-based quality monitoring of man-made fiber processing | 243 |
| Setting zone variables: effect on physical properties of PET textured yarn | 54 |
| Super micro spinning and texturing machines | 242 |
| Testing on morphology of blended air-textured yarn | 301 |
| Textured yarn production and technology: trends | 266 |

Nonwovens

| | |
|--|-----------------------------------|
| Bi-component spunbonded nonwovens – technical applications | 260 |
| Bilateral electrospinning: physical principles | 259 |
| Brief information | 157, 254, 261, 295, 296, 392, 393 |
| Can fiber producers help the nonwovens industry? | 259 |
| Cellulose meltblown nonwovens technology ready for commercialization | 256 |
| CFD analysis for aerodynamic layed nonwovens | 314 |
| CITME preview | 295, 296 |
| Company news | 157, 254, 261, 295, 296, 392, 393 |
| Cost saving in production of hygiene, medical and wipes nonwovens | 127 |
| Dornbirn 2006: nonwovens | 259 |
| Engineered short cut PET staple fibers for wet laying processes | 259 |

| | |
