

Editorial Program

CFI 2 / 2013

(Publication date: May 24, 2013)

(Ad closing date: April 30, 2013)

Raw Materials European Nylon Symposium 2013, Frankfurt/Germany
New PA6 plant in Belarus (Uhde Inventa-Fischer GmbH, Berlin/Germany)
BASF: PolyTHF plant in China
Fishing net waste recycling (Aquafil SpA, Arco/Italy)
Bio-based polymers

Fibers Global fiber market trends
Techtextil preview: new fiber developments
Dornbirn 2013: fibers for technical textiles
Galaxy viscose fiber for industrial end-use (Kelheim Fibres GmbH, Kelheim/Germany)
New super-microfibers based on cellulose and cellulose-2,5-acetate (F. Hermanutz, ITCF, Denkendorf/Germany)
Study on boron fiber: review (K. Singha, PIET, Harayana/India)
Comparison of physical and chemical properties between polysulfonamide and aramid (Xue Wen-Liang, Donghua University, Shanghai/China)
Resistance of high-performance fibers depending on environmental conditions (H. Rudolf, FILK, Freiberg/Germany)

Fiber Production Additive injection and mixing in modern spinning plants (F. Dickmeiß, Jörg Alexander, Oerlikon Barmag, Remscheid/Germany)
Production of carbon staple fibers (S. Zobel, Institut für Textiltechnik der RWTH Aachen/Germany)
Techtextil preview: fiber machinery for technical textiles and nonwovens
Electrospinning of cellulose and their complications – an overview (P. Ganesan, PSG College of Technology, Coimbatore/India)

Nonwovens Global market trends
Lyocell fibers for nonwovens (A.P. Periyasamy, DKTE Society's Textile & Eng. Inst. Ichalkaranji/India)
New spunlace technical center (Andritz Perfojet SAS, Montbonnot/France)
Company news

Buyers' Guide: Fiber Production
