Editorial Program

Man-Made Fiber Year Book 2014

Publication date: October 17, 2014
Ad closing date: September 25, 2014

Fiber Raw Materials
Global market trends for fiber raw materials
Dramatic changes in PA supply chain
Hardwood pulp for the production of high-tenacity viscose fibers
(A. Rußler, Glanzstoff Industries GmbH, St. Pölten/Austria)
Fiber production with bacteria and fungi – gaining raw materials by biotechnology
(T.R. Hammer, Hohenstein Institute, Bönnigheim/Germany)
Bioplastics from landfill waste
(Imperial College, London/UK)
Sustainable technical textile from recycled polyester
(I. De Schrijver, Centexbel Gent, Zwijnaarde/Belgium;
(E. Fatarella, Next Technology Tecnotessile, Prato/Italy)
European market trends for polyolefins
(EATP, Brussels/Belgium)
New dimension in plastics recycling
(Erema Ges.m.b.H, Ansfelden/Austria)

Fibers
New man-made fiber developments
Global fiber production: strong PET, PA and viscose fiber expansion
(Fiber Organon)
Global man-made fiber production: continued growth
(A. Engelhardt, The Fiber Year GmbH, Speicher/Switzerland)
Higher German chemical fiber production
(IVC, Frankfurt/Germany)
Global viscose fiber prices under pressure
New biobased polyester fiber
(Avantium, Amsterdam/Netherlands)
53rd Man-made Fibers Congress Dornbirn 2014
Cellulose fibers containing vegetable oils and lipophilic vitamins
(F. Meister, TITK, Rudolstadt/Germany)
Ionically activated viscose fibers – properties and applications
(R. Scholz, Kelheim Fibres GmbH, Kelheim/Germany)
New monofilaments for a sustainable technical textile market
(B. Fontana, Sider Arc Italia Srl, Comaredo/Italy)
Chitin, chitosan, bio-fibers – preparation, properties and use
(R.-D. Hund, ITM, Dresden/Germany; K. Richter, HMC+, Halle/Germany)
Ion exchange fibers
(Y. Hirai, Kaneka Corp. Osaka/Japan)
Effect of different fiber fly quantity on surface of cellulose diacetate filament
(P.X. Li, Donghua University, Shanghai/China;
J.X. Huang, Nantong Cellulose Fiber Co., Nantong/China)
Electrospun chitosan based nanofibers as wound dressing  
(Wang Xiaoli, Donghua University, Shanghai/China)
Renewable nanocellulose fiber for bullet-proof clothing  
(Innventia, AB, Stockholm/Sweden)
Stress relaxation studies in sugar cane fibers  
(S.D. Asagekar, Textile and Engineering Institute, Ichalkaranji/India)
PHP Fibers: positive outlook as a subsidiary of Indorama
Chemical fiber industry in Indonesia
Global carbon fiber market
Global elastane yarn markets
New fiber and yarn developments

**Fiber Production**
Project list of new polymer and chemical fiber plants 2014
Perfect dissolving technology for perfect fiber quality  
(List AG, Arisdorf/Switzerland)
Production technologies of nanofibers: overview and recent developments  
(S. Petrik, Technical University of Liberec/Czech Republic)
Production of high-tenacity acrylic fibers  
(M. Ketabchi, Acrylic II, Polyacryl Iran Company, Isfahan/Iran)
Environmentally friendly carbon fiber activation by plasma treatment  
(A.-K. Saelhoff, ITA, Aachen/Germany;  
N. Müller, diener electronic GmbH, Ebhausen/Germany)
PP spinning technology (BB Engineering, Remscheid/Germany)
Market trends for electrospinning of nanofibers
Filtration equipment for polymer melt lines  
(S. Vandendijk, Bekaert Advanced Filtration, Kortrijk/Belgium)
High efficiency bale press for viscose and polyester fiber bales  
(Autefa Solutions GmbH, Friedberg/Germany)

**Texturing**
World market trends for texturing machinery
Global production cost structure of false-twist textured yarns  
(ITMF, Zurich/Switzerland)
Characteristics of single and double heater draw-textured yarns/fabrics  
(M.Y. Gudiyawar, DKTES Textile & Engineering Inst., Ichalkaranji/India)

**Nonwovens**
Global market trends for nonwovens
Western Europe: chemical fiber titer program for nonwovens 2013
Nonwovens production trends in China
Innovations in PP materials for high performance nonwovens  
(J. Wassenaar, Total Refining & Chemicals, Seneffe/Belgium)
Staple fiber plant for small-scale production of carded nonwovens  
(Oerlikon Neumag, Neumünster/Germany)
