

Technical Textiles

Innovation, Technology, Application

2 April 2009
Volume 52

Leader

- E 39 Processing technologies for technical textiles at IMB 2009** B. Glamsch

Industry News

- E 42 PHP: takeover of Diolen Industrial Fibers**
E 42 Glanzstoff viscose yarn plant closed
E 42 Pilot plant for basalt fibers
E 42 Teijin: split of performance fibers
E 42 Dornbirn 2009: new fiber developments
E 43 New carbon fiber developments
E 43 Expansion of PET antistatic yarn (Teijin)
E 43 Global rPET consumption
E 44 More PVA fiber capacity
E 44 Lenzing: fiber production +3 %
E 44 NatureWorks: 2nd PLA plant
E 44 Smart-fiber Nomex (DuPont)
E 46 Management
E 46 Cooperation in nanofiber nonwovens
E 46 New headquarter in Singapore (Huntsman Textile Effects)
E 46 TenCate: higher sales and profit
E 47 Nonwovens Symposium in Stockholm (Edana)
E 47 Chinese nonwovens machinery order (Oerlikon Neumag)

Fibers/Yarns

- E 48 Rotary filters for purification and value addition in polymer melt processing (Gneuss Kunststofftechnik)**
E 49 Monofilaments for medical applications H. De Breuck
E 52 Pilot and laboratory equipment for technical materials F. Laukhardt, B. Krautwurst

Technical Textiles

- E 53 Weaving of aramid fibers (ITEMA)**
E 54 Wheelchair system with increased comfort (Vital Base)
E 55 Dosing equipment for spunbond production (Mann + Hummel ProTec)
E 55 Creel production expansion for technical yarns (Texkimp)
E 56 Ultra lightweight ergonomic seat system
E 56 coldblack finishing technology protects from UV rays (Schoeller Textiles)
E 57 Developing new types of conductive structures to optimize antistatic textiles (Part 2) E. Classen et al.
E 59 New generation of machines for warp-knitted multiaxial constructions (K. Mayer Malimo)
E 60 Knitted structures in medical textiles S. Viju

Nonwovens

- E 62 Feasibility study of spunbond plants considering the product width** D. Laukien
E 64 High filtration efficiency spunlaced filter media in plates press filter V. Lorentz
E 66 Opportunities and possibilities for new products based on wet-laid process Part 2: carbon fiber nonwovens C. Knobelsdorf, R. Lützkendorf

Technical Making-up

- E 68 Technology for overlap-free joining of semi-finished textile products** T. Gries et al.
E 69 IMB 2009, Cologne/Germany: exhibitor information
76 Calendar
E 70 Company Index / Advertisers Index / Imprint
