Boskovice – October 2019

Novibra at ShanghaiTex 2019

Novibra presents the latest innovations in spindle technology and energy saving measures at the forthcoming ShanghaiTex.

The energy saving spindle LENA has been designed for the highest speeds and lower energy consumption. It is the only spindle in the market with 17.5 mm wharve diameter and energy savings in the average of up to 6%.

The new generation of clamping crowns CROCOdoff and CROCOdoff Forte introduce genuine doffing without underwinding. The crowns work automatically depending on the spindle speed. The major advantages are significant reductions in maintenance costs. That is based on a lower ends down rate after doffing and minimized cleaning of the underwinding area.

Novibra's goal is to bring beneficial and customized solutions to the customers helping them to keep their leading position in the market. Novibra is looking forward to discussing the new products that fulfil one of today's biggest demands for energy savings and maintenance costs reduction.

See for yourself the many advantages on offer from Novibra. Visit us at ShanghaiTex from November 25 to 28, 2019: Hall E1, Booth A30.

Detailed information on Novibras's innovations and access for downloading the images are available online at www.novibra.com/news/.

About Rieter

Rieter is the world's leading supplier of systems for short-staple fiber spinning. Based in Winterthur (Switzerland), the company develops and manufactures machinery, systems and components used to convert natural and manmade fibers and their blends into yarns. Rieter is the only supplier worldwide to cover both spinning preparation processes and all four end spinning processes currently established on the market. Furthermore, Rieter is a leader in the field of precision winding machines. With 16 manufacturing locations in ten countries, the company employs a global workforce of some 4 740, about 20% of whom are based in Switzerland. Rieter is listed on the SIX Swiss Exchange under ticker symbol RIEN. www.rieter.com

About Novibra

Novibra, the world's leading supplier of high-speed spindles, is a subsidiary of the Rieter Group. The company, based in Boskovice (Czech Republic), creates customer value through system expertise, innovative solutions, after sales excellence and global presence. The leading position of Novibra spindles is based on patented design of spindle insert and the highest quality of the production. Almost all renowned manufacturers of ring spinning machines specify Novibra spindles for high performance. www.novibra.com
