Spring / Summer 2019

Menswear

For this collection my focus is on new proportions as well as developing interesting surface structures through special knitting techniques.

I am exclusively using very high-end materials, which help me create these details and structures. I use cottons, silks, summer cashmere, linen-silks, cotton-silks. All of these materials are washed, very soft, cooling and convey a feel of cocooning.

I play with transparent finishes versus non-transparent ones. I use monochromatic color stories to focus the eye on the details that are important to me and to create interesting and calming moods. I play with colors versus non-colors. Always making the man who is wearing a piece or a look of the collection the focus.

My collection is not complicated and easy to combine. All pieces work with each other. You can go for luxury essentials as well as more fashion driven styles. You can go for more subtle colors as well as for strong color choices.

I want my clients to have fun with this collection, find the look they are comfortable with and pieces that accompany them through a hot summer day and a cool spring evening. From day to night and week to weekend... dress up and dress down whenever you feel like it.

It is summer and it is about friends and family, about travel and exploring, about relaxing, good conversations, adventures, good food and wine, sleeping under an umbrella, listening to the waves... enjoy.

**Tim Kalkhof (in the center) wears**
