Fibers/Yarns			
20 years of Tencel lyocell fiber	1		
6 th China International Recycled Polyester Forum Hangzhou 2010	220		

Subject Index	Page	Page	Page
PP fiber producers 2010 (excluding film fibers/tapes) (Greater Europe)	152–155		
Regenerated cellulose-casein blend bio-fibers	158		
Special fiber structures through bicomponent technology	162		
Speedometer for surfactants	33		
Spider silk: from nature to bio-inspired materials	160		
Temperature regulating textile fibers containing large amounts of phase change material	221		
Textile recycling in the focus of industry and research	42		
Torsion fatigue properties of single PBO fiber	94		
Viscose fibers with new functional qualities	164		
Fiber Production			
70 m/min tire cord dipping line	227		
Biotechnological modification of polyester surfaces	167		
Brief introduction of polyester BCF yarn production	174		
Company information	233–234		
Competence in plant engineering	226		
Configuration and properties of PTT filaments	40		
Development possibilities in Lahnstein/Germany	104		
Effect of heat treatment on the mechanical properties of casein-g-polyacrylonitrile finers	51		
Filtech exhibition and congress in Wiesbaden	235		
Future scenario in polyester fiber and filament production	46		
Improvements on godet rolls	102		
Just-in-time spin-finish preparation plant	176		
Manufacturing and characterization of nanoclay-modified polypropylene fibers	38		
Melt-spun polyvinylidene-fluoride fibers of textile fineness	49		
Nanofiber spinning installations	225		
PET staple fiber line	169		
Pilot equipment for wet and gel spinning processes	103		
Preparation and characterization of novel regenerated cellulose fibers	228		
Processing polyester reclaim – innovative technologies	172		
Project list of new polymer and chemical fiber plants 2010	96		
Protective textile materials based on electrospun nanofibers	227		
Recycled spunbond nonwovens Lutradur Eco	225		
Sensors and online monitoring equipment for the synthetic fiber industry	176		
Spin finish – only processing aid or high performance lubricant with different functionalities?	230		
Spin finish metering pumps – the quiet revolution	109		
Structure development of Biofront (PLA) in fiber making process and its applications	106		
Thermal fiber treatment in man-made fiber production with application in the drawing process	170		
Versatile tool for researching structural and functional polymers	43		
Nonwovens			
Brief information	114, 178–181		
Company information	114, 177–181		
New structures for resorbable polymers	236		
Nonwovens production	180		
Nonwovens production 7 million tons	114		
Nonwovens production in Europe	181		
Structure and property of electro-spinning PAN nanofiber nonwovens by different pre-oxidation conditions	115		
Research			
Biotechnological modification of polyester surfaces	167		
Carbon fiber market – overview over the present situation	213		
Cellulose short fibers in elastomers	35		
Comparative analysis of triangle hollow fiber and round hollow fiber	92		
Comparison of heat shrinkage of polyethylene terephthalate filaments	211		
Configuration and properties of PTT filaments	40		
Design and development of novel filament with extraordinary ability to absorb water vapor	90		
Effect of heat treatment on the mechanical properties of casein-g-polyacrylonitrile fibers	51		
Functional alginate fibers	32		
High modulus fibers in the automotive industry – combination of a technical and an economic perspective	218		
Manufacturing and characterization of nanoclay-modified polypropylene fibers	38		
Melt-spun polyvinylidene-fluoride fibers of textile fineness	49		
Nano-modified PA 6 yarns for technical applications	215		
PBO fiber as precursor material for carbon fiber	27		
PLA fibers: new technical applications	89		
Polypropylene nanocomposite fibers with improved dyeability and thermal stability	34		
Preparation and characterization of novel regenerated cellulose fibers	228		
Protective textile materials based on electrospun nanofibers	227		
Regenerated cellulose-casein blend bio-fibers	158		
Special fiber structures through bicomponent technology	162		
Spider silk: from nature to bio-inspired materials	160		
Structure and property of electro-spinning PAN nanofiber nonwovens by different pre-oxidation conditions	115		
Temperature regulating textile fibers containing large amounts of phase change material	221		
Thermal fiber treatment in man-made fiber production with application in the drawing process	170		
Torsion fatigue properties of single PBO fiber	94

Editorial Program 2011

Volume 61

Issue	Main Topics	Conferences/Trade Shows
1 March Publication date March 17, 2011	Industry news; New fiber patents; Fiber raw materials; Cellulosic fiber specialties; PET & PA fibers; Textured yarns; Elastic fiber developments; Nonwovens technologies	5th European Nylon Symposium , Feb 28/Mar 1, 2011, Frankfurt Index 2011 , April 12-15, 2011, Geneva/Switzerland Techtextil 2011 , May 24-26, 2011, Frankfurt/Germany
2 June Publication date June 6, 2011	Industry news; New fiber patents; Fiber raw materials; PP fibers; Fibers for nonwovens; Fiber technology; Project list: new plants 2011; Nonwovens technologies	
3 September Publication date September 2, 2011	Industry news; New fiber patents; Fiber raw materials; Technical fibers; Global fiber market; ITMA 2011 preview: new machines for fiber production; World trade texturing machines	50th Man-Made Fibers Congress , Sept. 14-16, 2011, Dornbirn/Austria ITMA-ITMF World Textile Summit 2011 , Sept. 21, 2011, Barcelona ITMA 2011 , Sept. 22-29, 2011, Barcelona/Spain
4 December Publication date December 8, 2011	Industry news; New fiber patents; Fiber raw materials; Synthetic fiber specialties; Fiber technology; Spin finishes; ITMA report: new developments; Texturing technology

Technical Textiles 2011

Order now at the premium price of € 149.-!

Innovations • Trends • Markets

Technical Textiles in Applications

Publication date: December 2010

Three-part compendium for daily use

Trend reports and export feature India

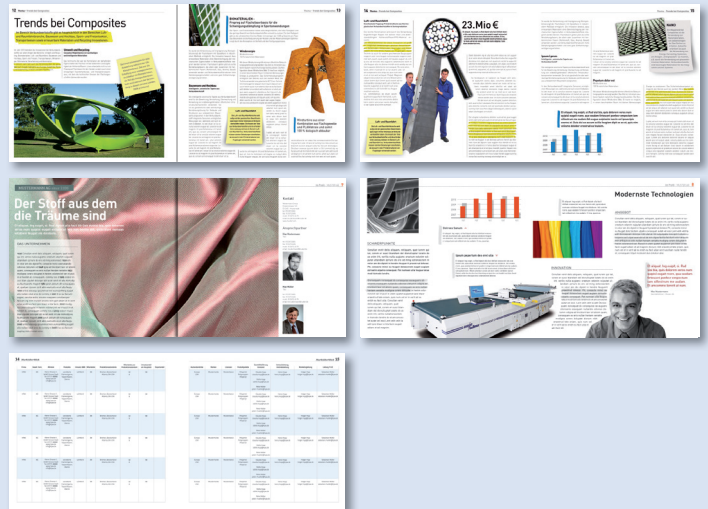

Recognized experts report on future perspectives and offer market prognoses

Company profiles

Products and services from suppliers from all market segments

European market data

Company data listed in clearly laid out tables

Yes, I wish to order ___ copies of the **Trendbook Technical Textiles 2011** at the price per copy of € 149.-*

Surname, First Name _____

Postcode, City, Country _____

Company _____

Tel. _____

Position _____

E-mail _____

Address _____
