

Man-Made Fiber Year Book 2018

Published by
Chemical Fibers International

October 2018

Leader

- 1 **In for bio-based polymers, in for bio-based additives!** G. Seide

Industry News

- 4-6 **New fiber developments**
8 **Investments in the cellulosic fiber industry**
9-10 **Capacity expansions and new fiber plants**
11-12 **Mergers, acquisitions and divestments**
13 **Carbon and glass fiber investments**
14 **Developments in carbon fiber processing and application**
15-16 **Investments in the nonwovens industry**

Raw Materials

- 18 **Feedstock investments**
19 **Is a ready-made polyester polycondensation pilot line possible?** U. Thiele
21 **2,5-Furandicarboxylic acid – a very promising building block** D.M. Rodriguez
24 **Force majeure & ADN shortage on the PA 66 market** Q. de Carvalho
24 **New approach for 5-HMF production (Thünen Institut)**
25 **Circular economy of PET waste by loop recycling – dream, fiction or reality?** U. Thiele
28 **Polybutylene succinate – an emerging textile polyester?** B. Weise, G. Wortberg et al.
30 **Technology for the production of high-performance textile-grade PA 6 (Uhde Inventa-Fischer)**
33 **Carbon fiber PAN precursor production – new approach** F. Francalanci, L. Garofalo, M. Marinetti, R. Proserpio

Fibers/Yarns

- 36 **World fiber market picks up after long period of slowing growth (The Fiber Year)**
38 **Trend in the carbon fiber market** E. Frank, M.R. Buchmeiser
39 **Carbon fiber development: from polyethylene-based precursors to carbon fibers** A. De Palmenaer, M. Merke et al.
41 **High-stiffness PLA yarns for bio-based self-reinforced composites** L. Van der Schueren, G. Buyle, B. Bizubova
43 **Solution spun co-extruded PLA fibers with pH-neutral degradation characteristics** G.-P. Paar, C. Molano, R. Fourné, T. Gries, S. Jockenhövel et al.
44 **Chemo-enzymatic hydrolysis of PET from textile waste (BOKU Vienna)**
45 **Structural changes in global elastane markets** D. Hart
47 **Continuous ceramic fibers**
49 **Basalt – technical fiber for civil applications** R.N. Turukmane, S.S. Gulhane, A.M. Daberao
52 **Innovative high-performance hybrid yarns made from recycled carbon fibers for lightweight structures** A. Abdkader, M. Hengstermann, C. Cherif
54 **Bio-recycling of post-consumer polyester (Carbios)**
55 **Improved bio-based fibers for automotive textile applications** A. Verdú Solís
57 **Yarns from bio-based polymers (PHP)**
59 **Thin and strong leather containing UHMWPE fibers (DSM Dyneema)**
60 **Application of superabsorbent fibers in technical areas (Technical Absorbents)**

Fiber Production

- 62 **Project list of new polymer and chemical fiber plants 2018 (Engineering companies)**
