Subject Index	page	page	page
Good organization ensures quality and quantity in weaving	35		
Heddle eye design for lowest warp yarn friction	301		
ITMA Asia & CITME 2008 preview	159-164		
Modular automation in wide-weaving machine for complex weaving structures.....	102		
New 0.20 mm heddle	103		
New jacquard weaving machine.....	104		
Projectile weaving machines for technical textiles.....	244		
Quality control on the weaving machine	245		
Rapier weaving machine with active rapier technology.....	160		
Sectional warping machine	33		
Statistical modeling of weavability of different size materials.....	38		
Waweon instrument for dynamic measurement and analysis of yarn and warp tension forces.....	40		
Weaving machine for long pile carpets.....	243		
Weaving machinery investments	242		
Weaving machines for technical textiles.....	304		
Yarn tensioning system for use in weaving preparation	37		
Knitting			
Double needle bar knitting machine for technical textiles	105		
Effect of stitch density and washing process on pilling behavior of plain knitted regenerated cellulose fabrics	168		
Intelligent yarn monitoring.....	48		
ITMA Asia & CITME 2008 preview	164-166		
Knitting machinery investments	246		
New features for special knitting machines	109		
New needles and ultra-lightweight carriages.....	44		
Peripheral equipment of knitting machines for controlling and management	106		
Pile warp knitting machine now has carbon fiber reinforced plastic components	307		
Productivity evaluation with work sampling method in flat knitting plants	306		
Stitch bonded fabrics with transferred needle loops	46		
Suitcase shaped fabric testing kit	47		
System provider for needles and sinkers up to E66	42		
Textile Finishing			
Atmospheric pressure plasma – new technology for modifying textile fabrics.....	120		
Bio-processing of cotton fabrics with commercial enzymes.....	308		
Direct-to-garment ink jet printers expanding the decorated garments market	118		
Drive and control systems for nonwovens	313		
Dyes for top performance on PET sportswear	116		
Economical and high-fast reactive dyes for wool	174		
Exhaust air cleaning for stenters.....	62		
Fully automated assembly for home textiles.....	122		
Functionalized nano-finishing to cotton fabrics by sol-gel process	110		
Heat-setting of carpet yarns	171		
High-efficiency textile squeezing rolls.....	253		
Impact of functional finishes on tearing strength of fabrics.....	172		
Improved shrinkage with new sanforizer	55		
Innovative artificial turf backing	62		
Internet based service portal	112		
Investigating the effectiveness of depot structures consisting of microcapsules.....	250		
ITMA 2007: saving energy in textile finishing	56		
ITMA Asia & CITME 2008 preview	183-191		
Low temperature peroxide bleaching of linen	316		
Microwave moisture sensor.....	318		
New dispensing system.....	119		
New filter technology	116		
New product for denim processing saves water, energy, and time	49		
New shuttle table system	119		
Optical brightening agents.....	314		
Polyamide calender rolls.....	112		
powerful high-speed dryer	312		
Process for easy-care finishing of cotton	50		
Resource Management product line	121		
Sample printer	117		
Shear-resistant softener for textile finishing.....	117		
Silicone multifunctional finishing.....	50		
Specific features of the discontinuous print afterwash of polyamide/elastane.....	252		
Spectroscopic analysis of the state of disperse dyes in solution.....	114		
Tailor-made line systems for carpet drying and coating.....	55		
Technology and application of modern hybrid silicones.....	180		
Washing and dry cleaning color fastness tester.....	112		
Waste-water recycling and heat recovery in textile finishing	176		
Yellowing on polyamide: reasons and prevention	248		
Nonwovens			
Automated online inspection for all kinds of nonwovens	260		
Chemical fiber titer program for nonwovens: Western Europe	84		
Drive and control systems for nonwovens	313		
European nonwovens production.....	214		
Fibers for wet-laid applications	146		
Hyperlacing technology.....	193		
ITMA Asia & CITME 2008 preview	150, 194, 196		
MPC polymers having skin barrier efficacy for textiles and nonwovens... ..	143		
New needlepunch nonwoven lines.....	321		
Nonwovens production Japan.....	136		
Structure comparison between PVA nonwovens and crosslinked PVA nonwovens by electrospinning.....	319		
Wet-laid technology for advanced filters	192		
Research			
Functionalized nano-finishing to cotton fabrics by sol-gel process	110		
Impact of functional finishes on tearing strength of fabrics.....	172		
Influence of cotton varieties on pectinase treatment.....	24		
Low temperature peroxide bleaching of linen	316		
Optimization of process variables of yarn preparatory through constraining yarn quality parameters	94		
Relaxation mechanism of Vortex spun yarn	91		
Simulation of staple fiber kinematics in turbulent air stream	22		
Splicing technique for core-spun Lycra/cotton yarn.....	31		
Statistical modeling of weavability of different size materials.....	38		
Stitch bonded fabrics with transferred needle loops	46		
Structure and properties of novel cellulose fibers.....	288		
Structure comparison between PVA nonwovens and crosslinked PVA nonwovens by electrospinning.....	319		
Waweon instrument for dynamic measurement and analysis of yarn and warp tension forces	40
