

It feels so precious.

**Bemberg™ by Asahi Kasei returns to Première Vision Paris with premium collections and top brand adoptions**  
**12-14 February, 2019 Hall 6 Booth H56/J57**

*From 1931 to 2019.*

***The story of Bemberg™ heritage has shaped a new future for smart innovation through research, knowledge and expertise delivering a new face of Bemberg™, the original material for modern living.***

Since 1931, **Bemberg™** is a new material definition for responsible luxury. The one for cool exquisite comfort, whose smart heritage is born in a circular economy.

Made by Asahi Kasei, the company is the sole maker of this one-of-a-kind, matchless, high-tech natural material, with a unique and precious touch and feel.

Starting from September 2018, Asahi Kasei has launched the **Bemberg™** brand in Europe, with an openness and positive approach that facilitates a stronger, more focused role in the market while supporting our partner's strengths too.

Enhancing core values through a more refined product and process in order to support our partner's mission to materially benefit the whole supply chain with beautiful products and a straight communication. This is the key motivation behind the launch of the **Bemberg™** global brand, taking the next steps on a journey that redefines the future of contemporary luxury with this unique fiber.

This is the reason why manufacture is playing a key role in the global role out of the latest **Bemberg™** innovations. Pioneering partner mills for apparel textiles featured at the booth include: A-GIRLS, Alberto Bardazzi, DEBS, Ekoten, Euromaglia, Fiveol Textil, Infinity, Ipeker, Jackytex, Lanificio Europa, Matias & Araujo, Sidonios Knitwear, SMI Tessuti, T.B.M. Group, Tessitura Uboldi Luigi, Texteam and Tintex Textiles. Key lining developments are presented by Brunello, Gi Tessil Foderami, Gianni Crespi Foderami Manifattura Pezzetti and Tessitura Marco Pastorelli.

Of mayor interest this season are the followings:

- The vegan habotai fabrics presented by Ipeker, the company that proudly holds the record as the first vegan fabric producer in the world, receiving Vegan V-Label certificate on 146 different products that stick to the guidelines of the European Vegetarian Label, many of which developed with Bemberg™.
- An exclusive development by Ipeker, made with a unique Bemberg™ - ROICA™ EF yarn created by the Italian premium throwster Ghezzi. ROICA™ EF, that belongs to the ROICA Eco-Smart™ family, is a Global Recycled Standard (GRS) certified ROICA™ stretch yarn constructed with more than 50% pre-consumer recycled content.
- A premium material created by Uboldi, made peculiar by two different finishing processes: Front side finished with **Velutine™** and the back side is a laminated fabric from Uboldi.

**Velutine™ Evo** is a new technical advance in the finishing process from Asahi Kasei presented in September 2018. The finish is refined and comparable to premium peached finishes today, but with a plus, it has a better environmental profile thanks to the reduction in the use of water and energy. A new benchmark for everyday luxury has been set demonstrating the company's ongoing commitment to R&D towards smarter innovations relevant to the market. The results are supported by a preliminary study carried out by ICEA according to the methodology of Life Cycle Assessment (LCA) 3rd party testing from ICEA, on data provided by TIFAS and focusing on environmental benefits that will accrue to partners efforts to offer value with values.

Moreover, you will be able to enjoy the circularity of the **Bemberg™** story: its source, manufacture and end-of-life credentials, as well as checking the **LCA** study, **signed by ICEA** and validated by **Paolo Masoni**. This is a further step that prove a new quality profile and standard for **Bemberg™** with a more responsible approach that defines its position. Full **GRS** certification, **Oeko-Tex 100**, **ISO 14001**, & **Eco-Mark**.

It feels so precious.

In this way **Bemberg™** adds value to its premium position on responsible issues, starting from the choice of its raw material that are a clear demonstration of the circular economy approach. **Bemberg™** is made from a cotton linter bio-utility waste, a natural derived and abundant source, and a truly unique one in the smart fiber arena that doesn't deplete food or forestry resources.

A premium brand adoption of this season is the one of **Ilaria Nistri**, the Italian brand of the namesake designer who, after years of experience in the family fabric business, first presented her line to press and buyers, becoming a finalist of the prestigious Who is on next? competition in 2008. The brand, for the SS 2018 selected several Infinity's **Bemberg™** fabrics for poetical and essential styles.

One of the brand's strengths is its deep knowledge of fabrics and its ability to combine contrasting materials, overlapping or inserting them to create a fluid silhouette that appears elegant yet edgy at the same time. An avant-garde collection of timeless pieces, where stylish research and easy wearing coexist. And a quality 100% made in Italy.

*Ilaria Nistri dress made with Infinity fabrics in Bemberg™ and laminated silk.*

*Martin Greenfield premium suits made with Bemberg™ lining*

Moreover, **Bemberg™** started a collaboration with **Martin Greenfield**, one of the world's most renowned tailor company based in Brooklyn. The company, founded in 1977 by Martin Greenfield, realizes hand tailored men's clothing to meet the requirements of innovative designers, specialty retailers, costume designers, stylists and individuals. For their finest made-to-measure suits, they choose Bemberg™ Yarn Dyed Lining produced in Italy and Japan for its preciousness and exquisite comfort.

Bemberg™ has new Compostability Certification. Innovhub-SSI report confirms Bemberg™ filaments disintegrate at 100% value within the limits specified by the UNI EN 13432, point A.3.1 for disintegration in the composting process. Also related is a new Ecotoxicity metric to EN 13432:2000 Annex E, the compost obtained from the Bemberg™ filaments according to ISO 16929:2013 revealed the absence of any ecotoxicity effect respect higher plants. The Bemberg™ filaments tested for the presence of heavy metals and other toxic hazardous substances comply with the requirements specified by the UNI EN 13432, for the substances listed in table A.1.

Asahi Kasei is proud to present the **Bemberg™** heritage that delivers a true precious uniqueness through responsible smart innovation and transparency. The aim is to create contemporary luxury materials able to raise an emotional response in relation to features as rarity, sensuality, research and creativity. The deep-rooted knowledge and the know-how of the brand add value to the supply chain, working only with the best amplifies our partner's knowledge and a dynamic commitment too.

It feels so precious.

**About Bemberg™**

Bemberg™, by Asahi Kasei, is a one-of-a-kind, matchless and original, new generation material made from the smart-tech transformation of cotton linter bio-utility waste, converted through a traceable and transparent closed loop process. Made in Japan, Bemberg™ also delivers on laboratory verified end of life options, and a finalized LCA study, signed by ICEA. Today an INNOVHUB report confirms that Bemberg™ filaments disintegrate at 100% and that Bemberg™'s very low concentration of hazardous substances complies with the limits specified by the UNI EN 13432. This important step builds and confirms a new quality profile that helps define Bemberg™'s more responsible position today, and to also measure the smart improvements for tomorrow. It is a unique and contemporary innovation designed for beautiful fashions everyday. Bemberg™ is cool and sensual with a unique, supple drape. It is antistatic and breathable while its soft versatility make it perfect for The Modern Wardrobe fashions, athleisure and everyday casual wear. Asahi Kasei also offers the market a unique family of advanced fit stretch yarns. Branded ROICA™, they are designed to improve and shape the way we live better today.

**Bemberg™ is Asahi Kasei's brand of regenerated cellulose fiber, Cupro.**

**Bemberg™ is also partner of C.L.A.S.S.**

**C.L.A.S.S. (Creativity Lifestyle and Sustainable Synergy)** Leading the way since 2007, we are a unique multi-platform HUB based in Milan specialized in integrating a new generation of eco values into your fashion and home product and company. These new values are needed to speak to a new, smarter and contemporary conscience consumer. C.L.A.S.S., founded by Giusy Bettoni, introduces a new way of design thinking that represents a shift in culture, which enables your business to be competitive and socially innovative.
