

Filidea has invested on its production capacity of corespun yarns with XLANCE® technology, fiber used for the production of longlasting workwear apparel with an excellent fitting.

The spinning mill Filidea, joint venture between Marchi & Fildi spa and Abaloğlu Holding A.Ş. specialize in technical and high performance yarns with natural and synthetic fibers, is increasing its production of blends with XLANCE®.

XLANCE® is the innovative elastolefin fiber, elastic, chlorine and UV resistant. It finds application on workwear and outdoor clothing, with natural and comfort fitting.

The comfort stretch feature follows the body's natural movement during the day-to-day work. Workwear clothing are so light, resistant and with a contemporary look. Resistance to abrasion and to frequent industrial laundry cycles with chemical products meet the needs of several professional sectors.

XLANCE® is produced by ©Xlance srl, Company located in Varallo Pombia (province of Novara – Piedmont – Italy) that found in Filidea the perfect partner for the development of specific yarns, that are getting more and more requested. An innovation that is getting more important thanks to the cooperation of the two textile Companies located in Piedmont.

Filidea has been producing XLANCE® yarns since 2009 and has now a great know-how. The Company to strengthens its leadership in technical yarns, for the main applications on protective garments, workwear, sportswear, racing and automotive.

Filidea has developed and consolidated several partnerships for the creation of complete supply chains and the collaboration with ©Xlance is a perfect example.

XLANCE® will be presented at Techtextil during the press event organized on Tuesday 14th May 2019 from 3.30 PM till 4.00 PM at Filidea Stand, Pad. 3 Stand G47

About Filidea

Filidea is a young and dynamic company born in 2008 from the ambitious project of two major international textile groups: Marchi & Fildi SpA, based in Italy, and Abaloğlu Holding A.Ş., belonging to the Turkish CSA Holding. Our MISSION is to create innovation following high environmental standards and process knowledge to the new generation.

Filidea offers a wide range of technological and performing yarns in blends with natural and man-made fibre, raw white and dyed; our technologies are ringspun, corespun, sirospun, worsted and open-end to cover the major application fields: protective-wear, work-wear, home-textile, automotive, filtration, fashion and tailor made products. Production companies are based in Italy, Brasil, Egypt and Turkey.
