Subject Index	Page	Page	Page
Measurements of yarn speed by means of laser sensor technology	134		
New air-jet spinning machine	124		
New cot grinder Rosy.....	133		
New lot numbering system for spinning plants.....	83		
New spinning system	190		
Short-staple spinning investments.....	132		
Top of the line yarn and package quality for innovative process design.....	22		
Weaving			
Automatic production of sample and production warps	27		
Brief information.....	89		
Company information	89		
Failure analysis of crankshaft fracture for air-jet weaving machines	140		
Global weaving machine investments...	137		
High speed rapier weaving machine for terry fabrics.....	84		
High-speed leno weaving with Posileno	29		
Influence of twist on dimensional stability	86		
Kaeser: Versatile rotary screw compressor.....	36		
MultiSphere - industrially mature technology for "woven" ropes	138		
New Tension Master enables higher productivity.....	31		
Options for saving material with jacquard leno technology.....	33		
Small compressors	48		
Super polish heddles	197		
W A S – expert assistance for weavers.....	88		
Weaving of aramid fibers	142		
Knitting			
Circular knitting machine at a glance....	146		
Company information	90		
Determination of propensity of fabrics to snagging	90		
Innovative machine for spacer fabrics....	90		
JL 42/1 with high speed modus.....	147		
Machines for warp-knitted multiaxial constructions	145		
Mechanical and thermal characteristics of polyester, cotton tri-layer weft knitted fabrics.....	37		
Monitoring system for circular knitting machines	203		
New seamless machine in 44"	39		
Panel fabric produced on the new TL 43/1/24 for bras with fewer seams	36		
Shipments of circular and flat knitting machines	148		
Textile preforms with high level of pre-fabrication for fiber reinforced composites	91		
Tubular knitted fabrics with various structures manufactured on flat knitting machines	198		
Yarn and knitted fabric parameters that affect heat resistance.....	144		
Textile Finishing			
Benefits of resource management for textile finishing.....	206		
Bioscouring of jute fabric: a step towards bioprocessing	100		
Brief information.....	208		
CFD simulation of stenter dryer.....	102		
Company information	208		
Development for solving the oligomer problem in dyeing polyester fibers	220		
Direct coating of elastic knitted fabric	126		
Dispersion stability for level PET dyeings (part 1)	40		
Dispersion stability for level PET dyeings (part 2)	94		
Dosing equipment for spunbonds	162		
Effects of washing cycles on some fabric properties and surface appearance	154		
Energy saving weight control system	211		
Functionalized nano-finishing to textiles using Ag nano-colloids	214		
Hotmelt application system	126		
Line concepts for the finishing of non-iron shirt and blouse fabrics.....	219		
Method for latex-free coating of carpet backs	104		
Milk protein fibers – dyeing and finishing (part 3)	92		
Modular position switches in textile finishing	203		
Nanofiltration of textile dye effluent	218		
New chrome-free dye range for wool	120		
New continuous indigo dyeing machine for denim fabric warps	98		
New digital tear tester	152		
New flame-retardant softener	180		
New flatbed printing machine	45		
New high-volume digital dye sublimation printer	152		
New Levafix dye.....	43		
New opportunities for matching intense brilliant shades	101		
New repellent and soil release finishes	96		
New roll covering system for use in dewatering	217		
New spray humidifier	106		
New straightening concept	105		
New temperature data logger	111		
New textile chemicals and dyestuffs.....	97		
New textile finishing system.....	121		
Optimization of quality costs and production costs in finishing machines	107		
Overflow dyeing machine with very low liquor ratio.....	209		
Portable sphere spectrophotometer for wireless communication to color measurement	149		
Savings in dyeing department thanks to CAD CAM	43		
Simple and reliable online fault detector	44		
Small compressors	48		
Successful continuous finishing of polyamide/elastane tapes	212		
Technology for dyeing Tencel	77		
Textile pretreatment process based on enzymes, catalysts and ultrasound	150		
Nonwovens			
Brief information.....	70, 184		
Company information	70, 184		
Feasibility study of spunbonds plants considering the product width	108		
Flame-retardant foam coating for consolidation of PET nonwovens	49		
Future of directly-formed cellulose webs	46		
Nonwovens industry: PP and viscose fibers dominate	21		
PLA for meltblown nonwovens	176		
Small compressors	48		
Technical Making-up			
Detection of plagiarism within seconds	166		
Effect of elastane fibers on sewing ability of polyamide fabrics	164		
Laser cutting and engraving of textiles	163		
Line concepts for the finishing of non-iron shirt and blouse fabrics.....	219		
Research			
Automatic tensile tests of elastomeric yarns – problem solutions	24		
Bioscouring of jute fabric: a step towards bioprocessing	100		
CFD simulation of stenter dryer	102		
Comparative evaluation of ring and compact yarn fabric properties after hot mercerization	195		
Effect of elastane fibers on sewing ability of polyamide fabrics	164		
Effects of washing cycles on some fabric properties and surface appearance	154		
Failure analysis of crankshaft fracture for air-jet weaving machines	140		
Functionalized nano-finishing to textiles using Ag nano-colloids	214		
Influence of processing parameters of polyester in Vortex spinning	191
